

Circuvent Technologies — Features & Functionalities

Complete catalog of every feature and functionality available in the HRMS & DevOps Portal.

1. Authentication & Security

Feature	What You Can Do
Email/Password Login	Register, login, logout with email and password
OTP Registration	Register with email OTP verification
TOTP Two-Factor Auth	Set up Google Authenticator / TOTP 2FA, verify on login
Password Reset	Reset password via OTP sent to email
Admin Login Portal	Separate admin-specific login page
Role-Based Access	12 roles: admin, super_admin, candidate, employee, hr_manager, manager, product_manager, developer, tester, ceo, intern, marketing
Session Management	JWT-based sessions (2h expiry), auto-logout on expiry
Security Audit Trail	Log all security events, vulnerability scans, compliance reports
Rate Limiting	Tiered rate limits: auth (5/15min), API (1000/15min), uploads (50/hr), password reset (3/hr)
Activity Logging	Every API request logged (user, method, URL, status, duration)

2. Public Marketing Site

Feature	What You Can Do
Landing Page	Animated hero, company stats, project showcase, open positions
Capabilities Page	Platform features and capabilities showcase
Team Page	Browse team members with individual profile pages
Careers Page	Browse job postings, view job details, apply online
Contact / Partnerships	Contact form and partnership inquiry

Feature	What You Can Do
HRMS & WorkStation Marketing	Product marketing pages
Privacy & Terms	Legal policy pages

3. User Dashboard

Feature	What You Can Do
Personalized Welcome	Dynamic greeting (Good morning/afternoon/evening) with first name
Onboarding Wizard	Step-by-step setup guide for new users (profile, resume, 2FA, first application) with progress ring
Profile Completion Tracking	Visual progress bar and percentage of profile setup completion
Quick Actions Grid	Role-segregated quick-launch cards (Employee: 6 actions, Candidate: 4 actions)
Application Overview	Summary stats for all application statuses with mini progress bars
Application Tracker	Track each application with status, timeline, contact info, linked profiles
Candidate Profile	Build and maintain fast-apply candidate profile (education, experience, certifications)
Recommended Roles	Curated job openings based on profile
Bank Details	View and update bank account, PAN, UAN, PF details (employees)
Theme Toggle	Switch between dark and light mode
Account Security	Manage 2FA, view security status, delete account
Privacy Settings	View data retention policies and export options
Birthday Celebrations	Automatic celebration effects on birthdays
Employee Promotion Celebration	Confetti animation when promoted to employee role

4. Employee Workspace

Feature	What You Can Do
Timesheets	Create, update, delete daily timesheet entries; track hours by project
Kanban Task Board	Create tasks, drag-and-drop between columns (Backlog → In Progress → Review → Done); task notes and AI insights
Payslips	View payslip history, download PDF payslips

Feature	What You Can Do
Clock In / Clock Out	Daily attendance with clock-in and clock-out timestamps
Leave Requests	Submit leave requests with 12+ leave types, view balances, track status
Salary Advances	Request salary advances, track approval status
Manager Approvals	Approve/reject team leave requests and salary advance requests
Resignation	Submit resignation, track resignation status
Org Directory	Browse organization structure and team members
Personal Details	View and edit profile information, contact details, personal info
Calendar Activity	View calendar events and upcoming activities
Leave Policies	View all available leave policies, balances, accrual rules
Attendance & Shifts	View assigned shifts and attendance records

5. Employee Management (Enhanced)

Feature	What You Can Do
Employee Directory	Advanced search and filter across all employees
Employee Lifecycle	Track lifecycle stages (onboarding → active → offboarding)
Goals & Performance	Set OKRs/goals, conduct performance reviews, rate employees
Employee Analytics	Performance trends, engagement metrics, team comparisons
Communication Center	Internal communication hub for announcements and updates
Employee Profile 360°	Comprehensive profile with performance, learning, benefits, history tabs

6. HR Portal

Feature	What You Can Do
Workforce Dashboard	Overview metrics — headcount, hiring, onboarding, leave, attendance
People Management	List/search employees, view profiles, create new employees, change roles/departments

Feature	What You Can Do
Onboarding Pipeline	Manage candidate onboarding stages, trigger onboarding (single/bulk), assign checklists
Leave Approvals	View all pending leaves, approve/reject with notes
Advance Approvals	Review and approve/reject salary advance requests
Compensation Management	Set default compensation per role, manage individual compensation packages
Recruitment Pipeline	Track candidate applications, update status, schedule interviews, trigger recruiting automation
Document Templates	CRUD document templates (offer letters, payslips, contracts), upload attachments
HR Automations	Create and manage workflow automations, recruiting automation rules
Calendar Settings	Configure weekend days and HR calendar
Timesheet Settings	Set timesheet approval mode (auto/manual)
Email Dispatch	Send template-based emails to employees/candidates
Feature Flags	Toggle feature flags for gradual rollout
Smart Notifications	Configure notification rules and templates
Payroll Automation	Toggle automatic payroll processing, generate payslips (individual/bulk)
Holiday Management	CRUD holidays, bulk import from Excel

7. Intern Management

Feature	What You Can Do
Intern Roles & Programs	Create and manage intern roles/programs with descriptions, requirements, capacity
Intern Applications	Review and process intern applications
Intern Enrollments	Enroll interns, track enrollment status
Intern Tasks	Assign tasks to interns, track progress, bulk update status
Intern Evaluations	Create and submit performance evaluations for interns
Intern Certificates	Generate completion certificates from templates (Puppeteer-based PDF rendering)

8. Admin Panel

Feature	What You Can Do
---------	-----------------

Feature	What You Can Do
Admin Overview	Workforce count, open projects, jobs, applications, onboarding stats; data export (Ctrl+E)
Project Management	CRUD R&D projects
Job Management	CRUD job postings with departments, requirements, descriptions
Candidate Management	View and manage all candidate profiles
User Management	List users, update roles, create employee accounts
Onboarding Management	Manage onboarding pipeline and stages
Payroll Management	List payslips, generate (individual/all), delete, download; toggle payroll automation
Holiday Calendar	CRUD holidays, bulk import from Excel
Attendance Management	View and manage all attendance records
Activity Logs	View system-wide API activity logs with filtering
System Health	Monitor DB health, system uptime, performance metrics, resource usage
System Configuration	CRUD application settings, audit trail, export configuration

9. ICM (Incident & Case Management)

Feature	What You Can Do
Dashboard	Ticket statistics — total, open, high-priority, overdue; status/priority distribution charts
Ticket List	List, filter, search tickets by status, priority, category, assignee
Create Ticket	File new incident tickets with title, description, category, priority, assignee
Ticket Detail	View ticket details, update status/priority, assign, set SLA deadlines
Comments	Add, edit, delete comments on tickets (internal/external)
Attachments	Upload, download, delete file attachments on tickets
History/Audit Trail	View complete ticket change history
Watchers	Add/remove watchers on tickets, configure notification preferences

10. Messaging & Inbox

Feature	What You Can Do
Conversations	Create direct and group conversations
Real-time Messages	Send/receive messages in real-time via Socket.IO
File Attachments	Send messages with up to 10 file attachments
Message Reactions	Add/remove emoji reactions to messages
Read Receipts	See who has read your messages
Typing Indicators	See when someone is typing
Message Forwarding	Forward messages to other conversations
Message Deletion	Delete messages
Conversation Archive	Archive/unarchive conversations
Pinned Conversations	Pin frequently used conversations
Advanced Search	Full-text search across all messages and conversations
Voice Recorder	Record and send voice messages
Rich Media Viewer	Preview images, documents, and media inline
Online Presence	See who's online, away, or offline in real-time
Conversation Info	View members, shared files, conversation settings

11. WorkStation (Jira-like Project Management)

Feature	What You Can Do
Dashboard	Project overview with summary metrics, configurable dashboard gadgets
Kanban Board	Visual kanban board with drag-and-drop issue management, cumulative flow diagram
Scrum Board	Sprint board with start/complete sprint, burndown charts
Backlog Management	Reorder backlog items, plan sprints, drag items between sprints
Issue Tracking	CRUD issues (bugs, stories, tasks, epics), comments, activity log, file attachments
Issue Hierarchy	Sub-tasks, linked issues, parent/child relationships
Time Tracking	Log time entries on issues, view time reports
Projects	CRUD projects with configurable settings
Boards	CRUD boards with customizable columns
Sprint Management	Create/start/complete sprints, sprint velocity tracking

Feature	What You Can Do
Components & Versions	Manage project components and release versions
Labels	Categorize issues with custom labels
Reports	CRUD reports, toggle favorites, generate report data
Roadmap	Roadmap view with timeline items
Analytics	Kanban analytics, cumulative flow diagrams, velocity charts
Team Management	View team, invite/remove members, workload management, bulk updates
Workflows	CRUD workflows with custom states and transitions
Automation Rules	CRUD automation rules, toggle on/off, view automation logs
Custom Fields	CRUD custom fields for issues
Permissions	CRUD permission schemes, notification schemes, role management
Gadgets	CRUD dashboard gadgets/widgets
Search & Filters	Full-text search, saved filter queries
Settings	WorkStation configuration and preferences
Retrospectives	CRUD retrospectives, add items, vote, resolve
Discovery Insights	CRUD insights, vote on insights
AI Task Breakdown	AI-powered epic/story decomposition, approve AI suggestions, view breakdown history

12. DevFlow (Azure DevOps-like DevOps Portal)

Feature	What You Can Do
Overview Dashboard	DevOps metrics, recent activity feed, security overview, AI insights
Task Boards	CRUD boards and tasks, drag-and-drop task management
GitHub Repos	Browse real GitHub repositories, branches, commits, pull requests, file trees
CI/CD Pipelines	CRUD pipelines and stages/steps, trigger pipeline runs, cancel runs, view run details
Test Plans	CRUD test plans, test suites, test cases, test runs, record test results; test configurations
Artifacts	CRUD artifact feeds and packages, version management, publish packages, usage statistics
Analytics	Velocity analytics, quality metrics, deployment metrics, code coverage, burndown data, custom reports

Feature	What You Can Do
Wiki	CRUD wiki pages (by ID or slug), view page revision history
Code Reviews	CRUD code reviews, approve/request changes, add/resolve review comments
Releases	CRUD releases, deploy releases to environments
Automation	CRUD automation rules, view execution logs
Sprints	CRUD sprints, add/remove tasks from sprints
Retrospectives	CRUD retrospectives, add items, vote on items
Environments	CRUD deployment environments, manage pipeline variables
Team Management	View team members, add/remove from team
Settings	GitHub webhook integration, DevFlow configuration
Enhanced DevFlow	Advanced DevOps experience with integrated view

13. Calendar System

Feature	What You Can Do
Multiple Views	Day, week, month, and agenda views
Event Management	CRUD calendar events with title, description, start/end times
Recurring Events	Create events with recurrence rules (daily, weekly, monthly)
Calendar Sharing	Share calendars with specific users with permission levels
Meeting Rooms	CRUD meeting rooms (admin), check availability
Free/Busy Lookup	Check user availability for scheduling
ICS Export	Export calendar events to ICS format
Timezone Support	Timezone-aware scheduling and display
Calendar Preferences	User-specific calendar display preferences
Interview Scheduling	Schedule interviews with Google Meet integration

14. Training & LMS

Feature	What You Can Do
Training Dashboard	Overview of available courses, enrollment stats, completion rates
Course Management	CRUD courses with thumbnails, modules, and content (admin)

Feature	What You Can Do
Course Catalog	Browse and search available courses
Course Enrollment	Self-enroll or admin-assign courses
Progress Tracking	Track module completion progress
Assessments	Take assessments, view results
Certificates	Earn and view completion certificates
Learning Paths	Structured learning paths with prerequisites
Training Calendar	Upcoming sessions and scheduled training
Training Admin	Manage all courses, modules, enrollment statistics (admin/HR)

15. Expense Management

Feature	What You Can Do
Expense Dashboard	Monthly trends, category/department/cost-center breakdowns, budget utilization
Submit Expenses	Create expense claims with receipt uploads and categorization
Expense Reports	Create, submit, track expense reports
Approvals	Approve/reject pending expense claims (manager/admin)
Analytics	Expense analytics, top spenders, trend visualizations
Policy Management	CRUD expense policies, per diem rates, spending limits (admin)
Reimbursement Tracking	Track reimbursement status
Export	Export expense data for reporting

16. Asset Management

Feature	What You Can Do
Asset Dashboard	Utilization reports, category breakdown, depreciation report, audit compliance
Asset Catalog	Browse all company assets with filtering
Asset Detail	View asset details, history, allocation status, maintenance records
Asset Requests	Request assets, view owned assets, warranty expiration tracking
Asset Allocation	Allocate/deallocate assets to employees (admin), bulk allocation
Maintenance	Schedule, complete, cancel asset maintenance (admin)

Feature	What You Can Do
Audits	CRUD asset audits, track compliance
Disposal	Manage asset disposal workflow
Insurance	Track asset insurance policies
QR/Barcode	Generate QR codes and barcodes for asset identification
Reports	Generate asset utilization, depreciation, maintenance cost reports

17. Employee Surveys

Feature	What You Can Do
Survey Dashboard	Overview of active surveys, response rates, trend analysis
Create Surveys	Build surveys with sections, multiple question types, and logic
Use Templates	Create surveys from pre-built templates
Respond to Surveys	Complete survey responses with various question types
Results & Analytics	View response data, charts, and statistical analysis
Survey Lifecycle	Publish, close, pause, resume, clone surveys
Survey Settings	Configure survey behavior and access
Report Generation	Generate survey result reports

18. Grievance Management

Feature	What You Can Do
Grievance Dashboard	Overview metrics, overdue grievances tracking
File Grievance	Submit formal grievances with category, description, evidence
Grievance Detail	View full grievance details, update status, track timeline
Investigator Assignment	Assign investigators (manual or auto-assign)
Comments	Add and view comments on grievances
Escalation	Escalate grievances to higher authority
Resolution	Record resolution actions and outcomes
Withdrawal	Withdraw filed grievances
Grievance List	List, search, filter, bulk update grievances
Policy Reference	View grievance handling policies
Export	Export grievance reports

19. Shift & Schedule Management

Feature	What You Can Do
Shift Dashboard	Overview of shifts and scheduling
Shift CRUD	Create, update, delete shift definitions
Schedule Management	Create individual and bulk schedules, publish schedules
Check-In / Check-Out	Clock in/out per scheduled shift
Shift Swap	Request shift swaps, approve/reject swap requests
Shift Patterns	CRUD repeating shift patterns
Employee/Department Views	View schedules by employee or department
Overtime Tracking	Monitor overtime hours
Staffing Levels	Track and manage staffing requirements

20. Benefits Administration

Feature	What You Can Do
Benefits Dashboard	Overview of available plans and enrollment status
Plan Management	CRUD benefit plans by type (health, dental, vision, life, retirement, etc.)
Enrollment	Self-enroll in benefit plans, cancel enrollment, view history
Open Enrollment	Manage open enrollment periods
Dependents	CRUD dependents for benefit coverage
Claims	Submit and track benefit claims
Deductions	View payroll deductions for benefits

21. Travel Management

Feature	What You Can Do
Travel Dashboard	Overview of travel requests and analytics
Travel Requests	Create, update, submit, cancel travel requests
Policy Validation	Auto-validate travel requests against policies
Approvals	Approve/reject travel requests (manager/admin)
Itinerary Management	CRUD itinerary segments (flights, hotels, transport), reorder
Travel Expenses	Track and submit travel-specific expenses

Feature	What You Can Do
Travel Policies	CRUD travel policies, per diem rates, spending limits
Department/Employee Views	View travel requests by department or employee

22. Compliance & Policy

Feature	What You Can Do
Compliance Dashboard	Overview of compliance status and pending actions
Policy Management	CRUD compliance policies, publish/archive
Acknowledgments	Assign policies for acknowledgment, track who has acknowledged
Regulatory Requirements	Track regulatory compliance requirements
Compliance Training	Assign and track compliance training completion
Audit Management	CRUD audits, track findings and remediation
Reports	Generate compliance reports

23. Recognition & Awards

Feature	What You Can Do
Recognition Dashboard	Metrics, top performers, recognition trends
Recognition Wall	Social feed of recognitions, give kudos to colleagues
Give Recognition	Recognize employees with points, emoji reactions, comments
Award Programs	CRUD award programs with nomination/selection workflows
Nominations	Nominate employees for awards
Leaderboard	View recognition leaderboards by period
Rewards Catalog	Browse rewards, redeem recognition points
Points Management	View point balance, transaction history
Employee Summary	View individual recognition history

24. Visitor Management

Feature	What You Can Do
Visitor Dashboard	Today's visits, currently in building, statistics
Pre-Registration	Pre-register expected visitors
Visitor Check-In	Check in visitors at reception

Feature	What You Can Do
Visitor Check-Out	Check out departing visitors
Visit Management	CRUD visits, approve/deny visits, cancel visits
Visitor Passes	Generate passes, deactivate passes, record pass returns
Watchlist	Manage visitor watchlist (add, remove, update)
Emergency Mode	Initiate building evacuation, view active emergencies
Search	Search visitor history
Reports	Generate visitor reports

25. Role-Specific Dashboards

Dashboard	Who It's For	Key Features
Product Manager	product_manager, admin	Product metrics, project status, resource allocation insights
Developer/Tester	employee, manager, product_manager, admin	Bug reports, code quality metrics, sprint progress, build statuses, PR tracking, test suites
Marketing	manager, product_manager, hr_manager, admin	Campaign performance, engagement analytics
CEO / Executive	admin (CEO)	Executive scorecard, risk alerts, scenario modeling, financial insights, segment performance

26. Workflow Automation

Feature	What You Can Do
Workflow Templates	CRUD workflow definitions with triggers, conditions, and steps
Workflow Execution	Start, cancel, monitor workflow instances
Approval Processing	Built-in approval/rejection steps in workflows
Workflow Metrics	View execution analytics and performance
Event-Driven Triggers	Automatically trigger workflows based on system events
Import/Export	Import/export workflow templates between environments
Template Validation	Validate workflow definitions before deployment

27. Notifications

Feature	What You Can Do
In-App Notifications	Real-time push notifications via Socket.IO
Notification List	View all notifications, mark as read
Smart Notifications	Configurable notification templates and delivery rules
Notification Preferences	Per-user channel and category preferences
Bulk Notifications	Send notifications to groups or all users
Analytics	Notification delivery and engagement analytics

28. Integrations & Platform

Feature	What You Can Do
GitHub Integration	Browse repos, branches, commits, PRs, file trees from GitHub
Jira-Style API	Full Jira-compatible project and issue API
Webhooks	Register, test, and manage webhooks for external systems
External Integrations	Connect Slack, JIRA, GitHub, and other systems
Integration Marketplace	Browse and install marketplace integrations
Mobile API	Device registration, push notifications, offline sync
Google Meet/Calendar	Interview scheduling with Google Meet links
Email Service	SMTP-based notifications, OTP delivery, template emails

29. AI & Analytics

Feature	What You Can Do
ML Model Management	CRUD ML models for prediction tasks
Performance Predictions	AI-powered employee performance forecasting
Turnover Predictions	Predict employee turnover risk
Project Risk Analysis	AI-based project risk assessment
Resource Allocation	ML-driven resource optimization recommendations
Natural Language Queries	Ask analytics questions in natural language
AI Task Breakdown	LLM-powered epic/story decomposition into tasks
Resume Analysis	AI-powered resume parsing and candidate matching
System Monitoring	Application performance, DB metrics, API usage dashboards

30. Feature Flags

Feature	What You Can Do
Flag Management	CRUD feature flags with names, descriptions, and default states
Targeting Rules	Target flags by user, role, percentage, or custom rules
A/B Testing	Run A/B tests with percentage-based rollouts
Gradual Rollout	Schedule gradual feature rollouts
Emergency Kill Switch	Instantly enable/disable features in emergencies
Audit Log	Track all flag changes over time
Analytics	Per-flag evaluation metrics and usage data
Bulk Evaluation	Evaluate multiple flags at once per user

31. Document Processing

Feature	What You Can Do
Document Upload	Upload documents for processing
OCR	Extract text from scanned documents
Document Analysis	AI-powered document classification and data extraction
Template Generation	Generate documents from templates (offer letters, payslips, contracts)
Batch Processing	Process multiple documents at once
Processing Metrics	View document processing statistics

32. Work Items

Feature	What You Can Do
Project Management	CRUD projects with team member management
Work Item CRUD	Create, update, delete work items (tasks, bugs, features, epics)
Hierarchy	Parent/child work item relationships
Comments & History	Threaded comments and change history on work items
Categorization	Work item types, statuses, categories, and priorities
Statistics	Work item metrics and progress tracking

33. Collaboration

Feature	What You Can Do
Team Workspaces	Create shared workspaces for teams
Shared Documents	Collaborative document management
Real-time Editing	Multiple users editing documents simultaneously
Comments System	Threaded comments on any resource with emoji reactions
@Mentions	Mention users in comments with auto-complete

Platform Capabilities

Capability	Details
Dark/Light Theme	Full dark and light mode with OS preference detection
Responsive Design	Works on desktop and mobile browsers
Real-time Updates	Socket.IO for instant notifications, messages, and status updates
PDF Generation	Payslips, certificates, and documents via Puppeteer/PDFKit
Excel Import/Export	Bulk data import/export via ExcelJS
File Uploads	Resume, document, image, and attachment uploads
Command Palette	⌘K / Ctrl+K keyboard shortcut for quick navigation
Code Splitting	Lazy-loaded pages for fast initial load
Error Boundaries	Graceful error handling with recovery UI
Activity Monitoring	System-wide performance and health monitoring
Graceful Shutdown	Clean server shutdown with connection draining
Docker Support	Docker Compose for PostgreSQL, Redis, backend, and frontend

Total: 33 feature categories · ~1,400 API endpoints · 120+ frontend pages · 12 user roles · 85+ database tables
